

Greetings

We hope this message finds you well as we move through the lingering chill of early spring. It is our great pleasure to announce the upcoming 13th Sendai Conference 2026.

This conference is organized by the NPO Japan Multiple Sclerosis Network and co-sponsored by five partner companies. We would like to express our sincere gratitude to these organizations for their continued support and collaboration.

With their generous support, we plan to invite five distinguished international experts. Their participation will promote active scientific exchange, broaden global perspectives, and strengthen collaborative networks across borders. We hope this conference will serve as a hub for sharing knowledge and fostering cooperation within the international community.

We are also pleased to invite abstract submissions in a wide range of fields, including basic research, clinical studies, and case reports related to inflammatory autoimmune diseases of the central nervous system. We warmly welcome contributions from across the country and look forward to lively discussions that transcend specialties and generate new insights.

We sincerely hope for your active participation and contributions, and we trust that this conference will provide a productive and inspiring forum for academic exchange. We greatly appreciate your continued support and collaboration.

Ichiro Nakashima

Chairperson of the Board of Directors, Japan Multiple Sclerosis Network

Professor, Division of Neurology, Tohoku Medical and Pharmaceutical University
